DEAR TEACHERS, COLLEAGUES AND FOLLOWERS,

It has been 60 years since the establishment of the Department of Pediatrics at the Medical University in Varna. This represents a whole conscious and productive human life, and in the context of a department, it means generations of trained medical students, residents, PhD and post-doctoral students, dental professionals and many other medical specialists. And, of course, thousands of treated children and adolescents, saved families and lifelong lessons learned!

These are hundreds of pages of scientific and popular science texts, battles fought for the health of Bulgarian children, and for maintaining the prestige and well-deserved high standing of all medical professionals dedicated to treating children. The building and expansion of the department in the first 30 years after its creation were followed by a true whirlwind. Phenomena such as frequent turnover of staff, restructuring of internal organization and teaching programs, mergers and separations with other related disciplines, and much more, became a daily reality for the department.

But it persevered, survived, and became stronger, more attractive, younger, more productive, and more desirable as a partner in the national and international scientific community. In the last 30 years, when the fear of exposure gave way to the desire to build, a fundamental truth began to be expressed aloud - pediatrics is a vocation!

No matter how difficult these last years have been, what has been created is impressive and provides a serious foundation for even higher achievements for future generations. Since we have long recognized the wisdom of our ancestors with their statement that "Unity makes Strength," we invite all like-minded people, students, current and former colleagues, teachers and pupils to share our birthday! As hospitable hosts, we will try to welcome you in the most generous way possible and share our common successes, aspirations, and future unconquered peaks!
